(B) We can each save 40%.  
(C) That store has only 20 shoes for sale.  
(D) Buying three pairs of shoes each are cheaper.

#### VI. Reading Comprehension

Most psychologists assign phobias to one of three broad categories: social phobias, in which the sufferer feels paralyzing fear of human encounters; agoraphobia with panic disorders, in which the person is periodically blindsided by overwhelming fear for no apparent reason; and specific phobias—fear of snakes, enclosed spaces, heights and the like.

Specific phobias are the easiest to treat, partly because they are the easiest to understand. As many as 30 percent of all people suffering from a specific phobia have at least one phobic close relative. For others, a childhood trauma—a house fire, say, or a dog bite—may trigger incipient fears.

Social phobias can be trickier. For some, the fear of a social encounter may occur only at large parties, making avoidance strategies seem easy. But social phobias can encroach into more and more areas of life, closing more and more doors. As sufferers grow increasingly isolated, they become ever more hopeless and risk developing such conditions as depression and alcoholism.

Unlike the specific phobic and the social phobic, the victim of panic disorder rarely knows where or when one will hit. Someone who experiences an attack in, say, a supermarket will often not return there, associating the once neutral place with the traumatic event. And when this begins to happen, panic disorder mutates into full-blown agoraphobia. As the perceived circle of safety shrinks, sufferers may be confined entirely to their homes.

46. Patients suffer from \_\_\_\_\_ rarely know what will trigger their fear.  
(A) social phobia (B) agoraphobia  
(C) acrophobia (D) claustrophobia
47. Specific phobias are the easiest to treat because \_\_\_\_\_.  
(A) the cause can be identified easily

(A) making avoiding strategies  
(B) isolating himself from others  
(C) preferring human encounters  
(D) suffering from depression
50. The victims of agoraphobia live in a terror of \_\_\_\_\_.  
(A) being confined entirely to their houses  
(B) the shrinking circle of their social life  
(C) attacking someone in a supermarket  
(D) anything outside the safety of the home
