

Qualitative Research 質性研究

Instructor: Su-Chiao Wu

Course Description:

This course is intended to provide the student with the basic skills needed to do qualitative research. Qualitative research is research that focuses on understanding, rather than predicting or controlling, phenomena. It is usually contrasted with traditional experimental and statistical research and is felt by many to be more appropriate to the study of human life. Included will be discussion of and practice in basic phenomenological description, structural analysis, research interviewing, and the repertory grid.
