建立個人EndNote Library

建立個人 EndNote Library

1. 從開始功能列中，開啟安裝好的 EndNote 21 軟體。
2. 以[Create a new library]，或點選 [File] → [New...] 來新增一個 Library，依個人需求選擇儲存路徑及編輯檔案名稱，點選 [Save] 即建立完成。
3. 建立個人 EndNote Library 後，在儲存的路徑下會產生兩個同名檔案，副檔名分別為「.enl」及「.data」。欲變更 EndNote Library 儲存路徑時，需兩個檔案同步移動。

Note :

1. 若想開啟先前建立的 Library，可點選 Open an existing library 或 File → Open Library，再選擇該 Library 路徑以開啟舊檔。
2. 先前的 Library 版本為 X9.3 以上，可與 EndNote 21 軟體完全相容；但 Library 版本為 X9.2(含)以下版本，在 EndNote 21 開啟舊檔時，需將 Library 另存轉檔。

Introduction

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccups, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1992; Morrow *et al.*, 1999), we speculated that the autonomic nervous activity might be changed when acupuncture at the P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with depressed

1.焦點解決短期團體諮商對國中生情緒智能輔導

[會議論文] 郭人鳳 張高賓 2012 第十五屆海峽兩岸家庭教育學術研討會論文集

摘要： 本研究旨在探討焦點解決短期團體諮商對國中生情緒智能輔導效果之研究。實驗組接受焦點解決取向團體諮商之實驗處理，控制組接受一般性諮商。結果顯示，實驗組在輔導後的情緒智能得分顯著高於控制組。此項研究對於改善青少年問題、焦點解決、團體諮商、智能輔導等領域具有參考價值。

Export to EndNote - Manuscript Matcher Preferences Help

In order to better detect the overall trends and research hot spots of data mining in Chinese academic libraries, 329 related studies were extracted from CNKI (China National Knowledge Infrastructure) and analyzed by using bibliometrics and keyword network analyses(Sara Connell et al., 2021).

Bibliometrics was used to analyze the distribution of the overall trends, authors, institutions, research levels, and keywords in the related field. Cluster analysis was applied to the keyword co-occurrence network to show hot issues in the application research of data mining in Chinese academic libraries. Results indicate that findings in this area generally show an upward trend, but few high-yielding authors are found, the volume of journals is low, research institutions are scattered, and the rate of funding support is not high.
