## End User License Agreement

EndNote® End User License Agreement

THE TERMS AND CONDITIONS OF THIS AGREEMENT SHALL NOT APPLY IF YOU HAVE OBTAINED ACCESS TO THIS PRODUCT PURSUANT TO AN INSTITUTIONAL SITE LICENSE. UNDER SUCH CIRCUMSTANCES, YOUR USE OF THIS PRODUCT SHALL BE GOVERNED SOLELY BY THE TERMS AND CONDITIONS OF SUCH LICENSE. If you would like to understand more about all of the rights that you or your employer have to use the Product, you should refer to the institutional site license agreement between you or your employer and Clarivate or authorized resellers.

BACKGROUND. Camelot UK Bidco Limited ("Clarivate Analytics") has developed a proprietary software application known as EndNote® (the "Software"). By using the Software and/or its accompanying manuals (the "Documentation" and together with the Software, the "Product"), you (the "End User") agree with Clarivate Analytics to be bound by the terms and conditions set forth herein. Clarivate Analytics is willing to permit you to use the Product only upon the condition that you accept and comply with all of the terms of this agreement ("Agreement").

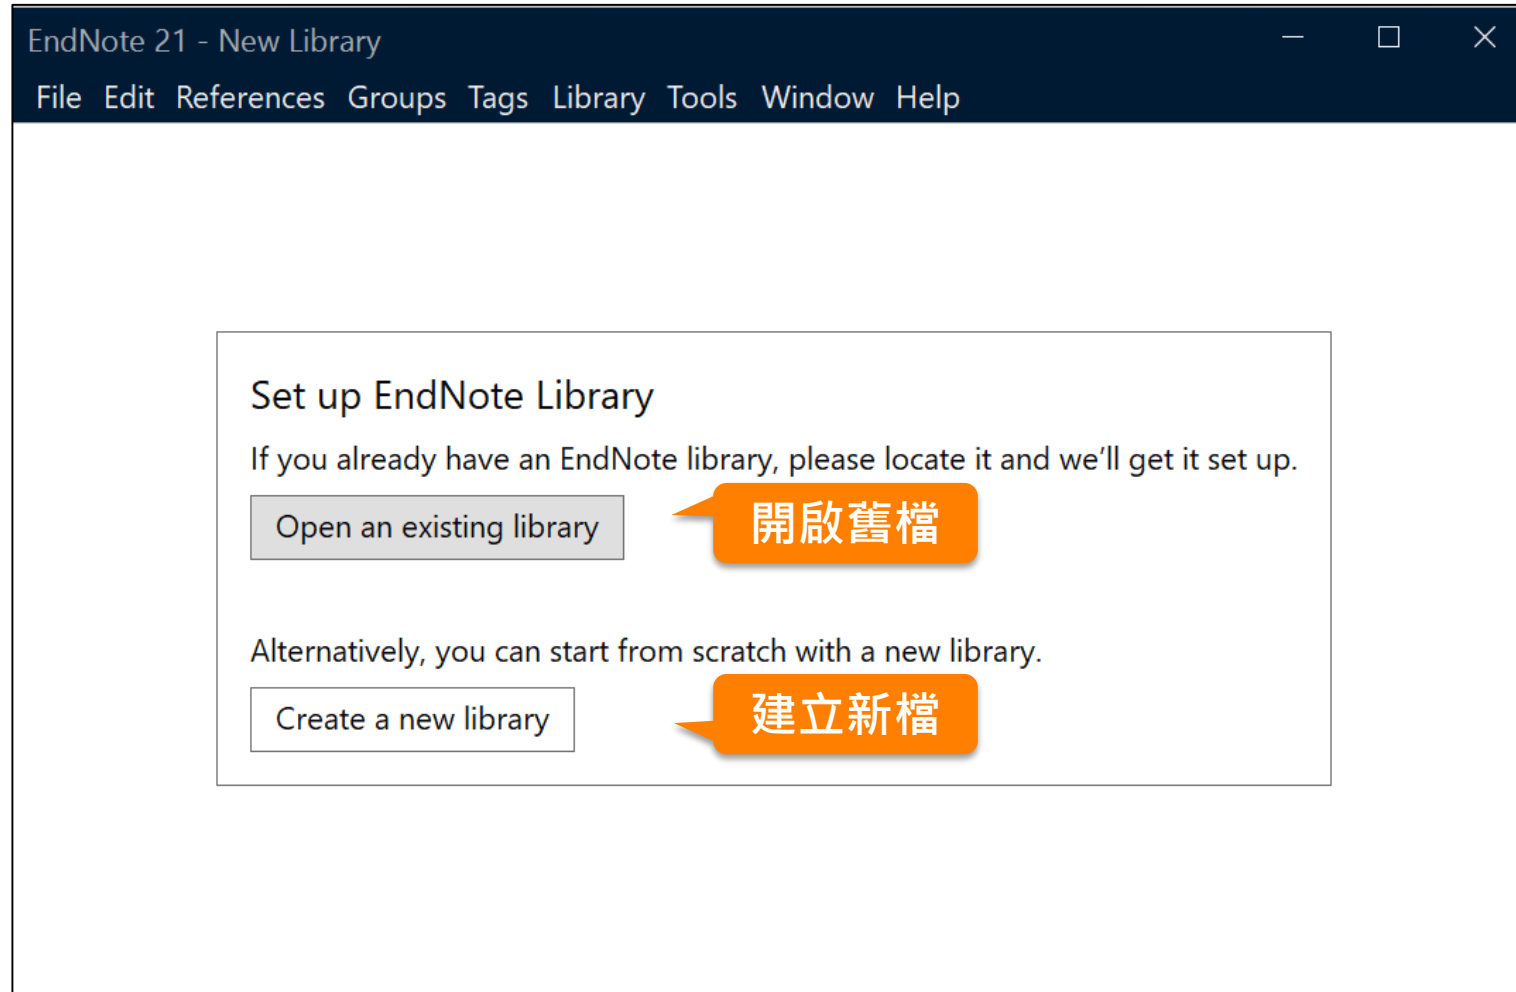

THEREFORE, for good and valuable consideration, including the rights and license granted in this Agreement, and intending to be legally bound, Clarivate Analytics and End User agree as follows:

I accept the license agreement

I do not accept the license agreement

# 建立個人EndNote Library

# 建立個人EndNote Library

The image shows the 'EndNote 21 - New Library' dialog box. The title bar reads 'EndNote 21 - New Library' and the menu bar includes 'File Edit References Groups Tags Library Tools Window Help'. The main content area is titled 'Set up EndNote Library' and contains the text: 'If you already have an EndNote library, please locate it and we'll...'. Below this text are two buttons: 'Open an existing library' and 'Create a new library'. The 'Create a new library' button is highlighted with an orange border. Below the buttons, it says 'Alternatively, you can start from scratch with a new library.' To the right, a Windows File Explorer window titled 'EN New Reference Library' is open, showing the 'OneDrive' folder selected in the left sidebar. The main pane is empty with the text '沒有符合搜尋條件的項目'. At the bottom of the File Explorer, the '檔案名稱(N):' field contains 'My EndNote Library' and the '存檔類型(T):' field is set to 'EndNote Library (\*.enl)'. The '存檔(S)' button is highlighted in orange.

Anomitri, C. and H. Lazaratou (2017). "Asperger syndrome and schizophrenia: Neurodevelopmental continuum or separated clinical entities?" *Psychiatriki* **28**(2): 175-182.

This article is an overview of the literature on Asperger's syndrome and schizophrenia and aim to discuss their similarities and differences. Eugen Bleuler who associated the terms "schizophrenia" and "autism" a century ago, viewed autism as a form of solitude of schizophrenic patients representing withdrawal from reality. Ever since, there has been confusion as to the boundaries between these conditions. Nowadays recent research, from a variety of perspectives-

### Designing a Chat-bot that Simulates an Historical Figure

E. Haller and T. Rebedea

19th International Conference on Control Systems and Computer Science Bucharest, ROMANIA May 29-31 2013

Publisher: Ieee Computer Soc 2013 Pages: 582-589

DOI: 10.1109/cscs.2013.85

Annotated ▼ Insert Copy ✓

Haller, E. and T. Rebedea (2013). Designing a Chat-bot that Simulates an Historical Figure. 19th International Conference on Control Systems and Computer Science, Bucharest, ROMANIA, Ieee Computer Soc.

There are many applications that are incorporating a human appearance and intending to simulate human dialog, but in most of the cases the knowledge of the conversational bot is stored in a database created by a human experts. However, very few researches have investigated the idea of creating a chat-bot with an artificial character and personality starting from web pages or plain text about a certain person. This paper

人工智慧音樂介入芳香療法對自律神經影響之探討-以護理人員為例

何麗卿

開南大學 碩士 2023

<https://hdl.handle.net/11296/ghrus5>

故本研究主旨分別探討芳香療法、人工智慧音樂、人工智慧音樂介入芳香療法對自律神經之活性影響，並觀察是否人工智慧音樂介入芳香療法使用後有加乘之作用。本研究以北區某精神專科醫院的急診護理師、加護病房護理師、急性病房護理師為受試者，利用HRV(heart rate variability) 舒壓儀監測使用芳香療法後、人工智慧音樂後、人工智慧音樂介入芳香療法，分析壓力指數、心跳，心率變異數據:SDNN、總功

## Chatbots for future docs: exploring medical students' attitudes and knowledge towards artificial intelligence and medical chatbots

Julia-Astrid Moldt <sup>a</sup>, Teresa Festl-Wietek <sup>a</sup>, Amir Madany Mamlouk <sup>b</sup>, Kay Nieselt <sup>c</sup>, Wolfgang Fuhr <sup>d</sup> and Anne Herrmann-Werner <sup>d</sup>

<sup>a</sup>University of Tuebingen, Tuebingen, Germany; <sup>b</sup>Institute for Neuro- and Bioinformatics, University of Luebeck, Luebeck, Germany; <sup>c</sup>Institute for Bioinformatics and Medical Informatics, University of Tuebingen, Germany; <sup>d</sup>Department of Internal Medicine W Psychosomatic Medicine and Psychotherapy, University Hospital Tuebingen, Tuebingen, Germany

### ABSTRACT

Artificial intelligence (AI) in medicine and digital assistance systems such as chatbots will play an increasingly important role in future doctor – patient communication. To benefit from the potential of this technical innovation and ensure optimal patient care, future physicians should be equipped with the appropriate skills. Accordingly, a suitable place for the management and adaptation of digital assistance systems must be found in the medical education curriculum. To determine the existing levels of knowledge of medical students about AI chatbots in particular in the healthcare setting, this study surveyed medical students of the University of Luebeck and the University Hospital of Tuebingen. Using standardized quantitative questionnaires and qualitative analysis of group discussions, the attitudes of medical students toward AI and chatbots in medicine were investigated. From this, relevant requirements for the future integration of AI into the medical curriculum could be identified. The aim was to establish a basic understanding of the opportunities, limitations, and risks, as well as potential areas of application of the technology. The participants (N = 12) were able to develop an understanding of how AI and chatbots will affect their future daily work. Although basic attitudes toward the use of AI were positive, the students also expressed concerns. There were high levels of agreement regarding the use of AI in administrative settings (83.3%) and research with health-related data (91.7%). However, participants expressed concerns that data protection may be insufficiently guaranteed (33.3%) and that they might be increasingly monitored at work in the future (58.3%). The evaluations indicated that future physicians want to engage more intensively with AI in medicine. In view of future developments, AI and data competencies should be taught in a structured way during the medical curriculum and integrated into curricular teaching.

### ARTICLE HISTORY

Received 15 December 2022  
Revised 6 February 2023  
Accepted 16 February 2023

### KEYWORDS

Medical students; artificial intelligence; applications in education; human-computer interface; teaching/learning strategies; chatbot

### Introduction

The healthcare system is undergoing a digital transformation, and artificial intelligence (AI) will play a significant role in defining everyday medical practice [1]. The location- and time-independence of digital applications have created new opportunities for medicine and health communication that are also changing the doctor – patient relationship [2]. The growing importance of e-health applications, wearables and AI applications such as chatbots can empower patients to collect their own health data [3,4].

Furthermore, the digital networking of patients, hospitals, physicians and other healthcare services is enabling a shift from a physician-centric approach to more patient-centered treatment [5]. To exploit the potential of this technical innovation and ensure optimized care for patients, future doctors must be equipped with the appropriate skills [6]. Future physicians will not only need to be flexible in responding to different healthcare contexts but will also require

the competence to adequately deal with procedures and applications involving AI and the accompanying big data [7]. The growing complexity of medicine and increasing specialization of knowledge require the integration of AI as well as the interaction with digital assistance systems already in the curriculum of medical studies [8–10]. According to current literature, although AI competencies are essential for medical practice, they are not comprehensively taught in medical education [7,11,12].

### Medical curriculum in Germany

A look at the national competence-based learning objectives catalog for medicine (NKLM) [13] shows that the teaching of competencies in the area of medical apps and artificial intelligence is still under-represented. The national competence-based learning objectives catalog for medicine is currently being further developed on the basis of the 'Master Plan

<https://www.ncbi.nlm.nih.gov/pubmed/30467930>

In the 12 years since Dudgeon et al. (2006) reviewed major pressures on freshwater ecosystems, the biodiversity crisis in the world's lakes, reservoirs, rivers, streams and wetlands has deepened. While lakes, reservoirs and rivers cover only 2.3% of the Earth's surface, these ecosystems host at least 9.5% of

# 自行鍵入與夾帶檔案

# 資料匯入 – 自行鍵入

## 自行鍵入要注意：

1. 文獻類型[Reference Type]要選擇正確。
2. 一位作者一行，每位作者皆獨立一行。
3. 當以英文輸入時，作者姓氏在前要加逗點，如：Wang, Da Min；姓氏在後不用加逗點。同篇書目資料請統一格式。
4. 單位英文後方請加上「,」符號，如：「Ministry of Health and Welfare,」

## Introduction

### Citation-引文(註)

According to traditional Chinese medicine, the pericardial meridian is associated with the pain or fullness in the chest, palpitations, depression, restlessness, manic or depressive disorders, nausea or vomiting, hiccup, gastric pain, and distension in the upper abdomen (Bai and Baron, 2001). Since the parasympathetic modulation of both heart and gut is largely mediated by the vagus nerve, and since vagal stimulation of the gut can result in increased peristalsis while the vagal stimulation of the heart can result in decreased heart rate (Guyton and Hall, 1996), it is speculated that to some extent the pericardium meridian might be associated with the autonomic nervous modulation of the subject.

Acupuncture or acupressure at the Neiguan (P6) point, the most frequently used acupoint in the pericardium meridian, has been shown to lessen nausea and vomiting (Dundee *et al.*, 1987, 1988, 1989a and b; Ho *et al.*, 1989; De Aloysio and Penacchioni, 1992; Belluomini *et al.*, 1994; Fan *et al.*, 1997; Harmon *et al.*, 2000). Because nausea and vomiting are also related to autonomic nervous activity (Morrow *et al.*, 1992; Morrow *et al.*, 1999), we speculated that the autonomic nervous activity might be changed with acupoint P6 point was performed.

Heart rate variability analysis is a useful non-invasive method for the assessment of autonomic nervous modulation of heart rate. Some diseases are associated with decreased vagal modulation, and the restoration of vagal modulation is associated with the improvement

## Chatbots in healthcare

Artificial intelligence (AI) in medicine and digital assistance systems such as chatbots will play an increasingly important role in future doctor – patient communication [1-3]. To benefit from the potential of this technical innovation and ensure optimal patient care, future physicians should be equipped with the appropriate skills. Accordingly, a suitable place for the management and adaptation of digital assistance systems must be found in the medical education curriculum.

# 同步及分享

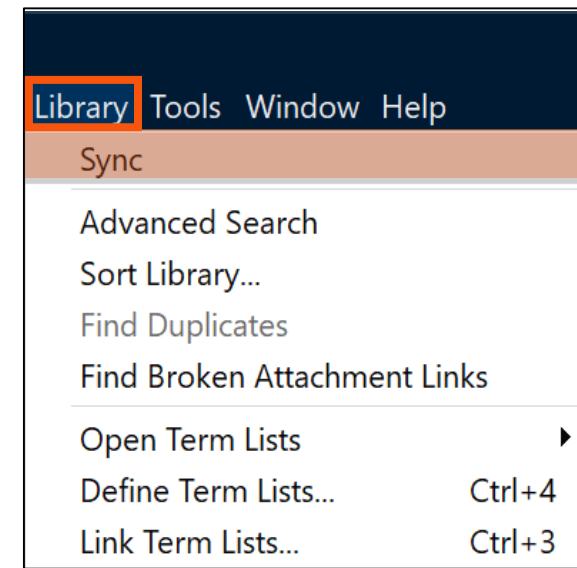

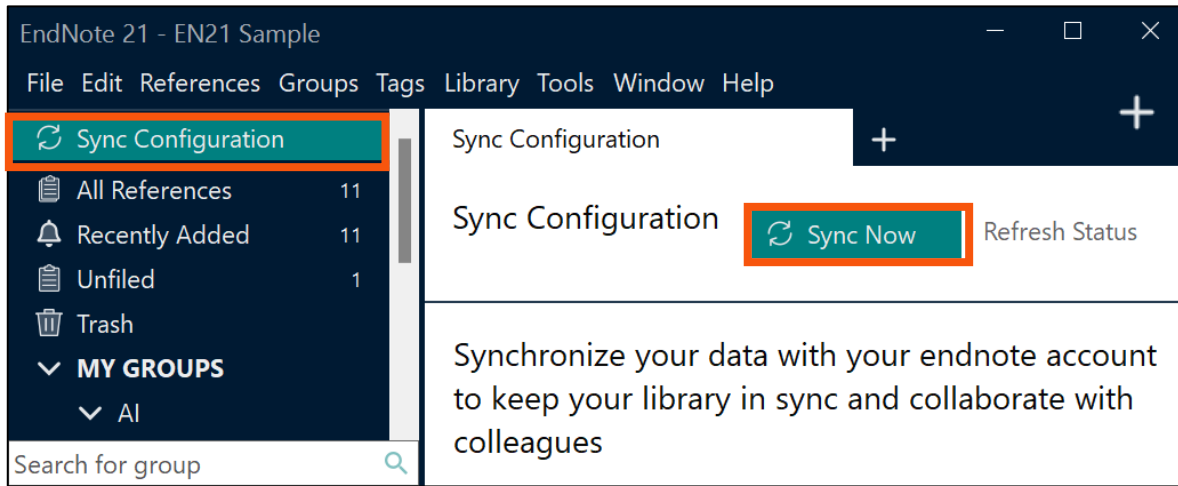

# 管理書目資料 – 同步及分享功能

使用者如果有需要進行異地存取同份Library，能使用同步功能將書目資料上傳至 EndNote Online。

分享 Library 可用於與小組成員、研究夥伴進行書目資料分享，能選擇分享範圍是整個Library或對個別群組（限一般群組），並且可調整對方操作權限。

**※ 需有EndNote個人化帳號(可免費註冊)**

# EndNote Library 同步功能

鍵入兩次常用Email

表格必填區\*  
密碼需含特殊字元

鍵入帳號密碼  
(WOS帳密也適用)

按OK後即登入

Background: Complementary medicine (CM) is gaining popularity worldwide. According to the 2019 World Health Organization global report on traditional and complementary medicine (T&CM), 80% of member states acknowledged practicing T&CM. In the United Arab Emirates, T&CM practice prevalence in 2012 was 20-39%. These trends highlight physicians' need for knowledge on CM, such as cupping therapy. OBJECTIVE: This study aims to assess knowledge, practice, and attitude toward cupping therapy (CT) among physicians in Sheikh Khalifa medical city (SKMC). METHODOLOGY: A cross-sectional study was conducted from September 2020 to March 2021 among the physicians of

# 分享功能路徑

# 分享對象至信箱收邀請信

noreply@endnote.com 透過 amazonses.com

寄給 ▾

下午12:00 (0 分鐘前)

████████████████████ would like to share an EndNote library with you.

To accept this invitation and access Jamie 's library, you must have EndNote X7.2 or later installed, and we strongly recommend using EndNote 20 for the best experience.

Once you've accepted this invitation, you will be able to access all of the references, PDFs, file attachments, and notes in this shared library from your EndNote desktop application.

Accept: <https://account.endnote.com/enwservices/invitation/#/f252b9dd-2e25-4640-8443-10dfc69ff700>

Don't have EndNote for desktop? Get the free trial version now to access shared libraries and much more. [http://endnote.com/buy?utm\\_source=en-desktop&utm\\_campaign=ls-email-ro&utm\\_content=buy-en](http://endnote.com/buy?utm_source=en-desktop&utm_campaign=ls-email-ro&utm_content=buy-en)

透過連結進入

Learn more about sharing your research with EndNote. [http://endnote.com/?utm\\_source=en-desktop&utm\\_medium=edm&utm\\_campaign=ls-email-ro&utm\\_content=learn-more](http://endnote.com/?utm_source=en-desktop&utm_medium=edm&utm_campaign=ls-email-ro&utm_content=learn-more)

If you do not wish to accept this invitation, please notify ██████████ directly.

Jamie has invited you to join a shared EndNote library.

[Learn More](#)

To accept this invitation, sign in using the same credentials you use when accessing EndNote online or syncing your desktop library, or create a new account. To access this shared library you must have EndNote X7.2 or later installed.

### Sign In with your EndNote account

完成邀請接受，即可使用

Invitation accepted. For access to Jamie's shared EndNote library, follow these instructions.

Share Library 使用方式

## Update EndNote to version X7.2 or later

Now, go to the desktop to make sure you're on the latest version. To check:

### Windows

1. Click on **Help > About**
2. Click on **Program Updates** or download the [installer](#).

You can now access the shared library from your desktop. Just go to File > Open Shared Library.

### OS X

1. Click on the **EndNote** menu dropdown.
2. Click on **Check for Updates** or download the [installer](#).

You can now access the shared library from your desktop. Just go to File > Open Shared Library.

# Fears of second coronavirus outbreak hit global shares

## Chapter 1

Share prices had gained in recent weeks amid hopes that the economy would rebound as authorities loosened restrictions put in place to try to slow the spread of the virus.(Bagheri et al., 2021; Silva et al., 2020)

Last week's surprise report showing US employers had restarted hiring in May helped to push the tech-heavy Nasdaq index to new highs(Haibo et al., 2020; Sharma et al., 2020).

But the recovery remains tentative. On Thursday, the US Labor Department reported that another 1.5 million people had filed new unemployment claims last week. More than 30 million continue to collect the benefits, it said.

Bagheri, A., Fellows, C. M., & Boyer, C. (2021). Reversible Deactivation Radical Polymerization: From Polymer Network Synthesis to 3D Printing. *Adv Sci (Weinh)*, 8(5), 2003701.  
<https://doi.org/10.1002/advs.202003701>

於參考文獻來源的 Group 右鍵選擇 Manuscript Matcher 可將 Group 中的參考文獻自動帶進 EndNote 選刊工具

Intelligence  
he lay  
ainties of  
the integration of such technology into everyday life. As  
primary care clinicians continue to struggle against ever-  
increasing loads of asynchronous, electronic work, the potential  
for AI to improve the quality and efficiency of this work looms  
large. In this essay, we discuss the basic premise of open-  
access AI chatbots such as CHATGPT, review prior applications  
of AI in healthcare, and preview some possible AI chatbot-  
assisted in-basket assistance including scenarios of  
communicating test results with patients, providing patient  
education, and clinical decision support in history taking

### 如何運作

只要幾項主要資訊 - 標題、摘要、參考文獻 - 我們就可以協助您找到適合稿件的正確期刊。

我們正在申請專利的技術，會分析來自 Web of Science 的數百萬個資料點和引用文獻關聯，在這些出版品和您的引用文獻資料之間找出有意義的關係。

幾秒鐘後，您將可輕易得知 JCR® 資料、主要期刊資訊、出版者詳細資料，協助您比較您的選項及提交稿件。

只有 Clarivate Analytics 可以駕馭 Web of Science 的強大，支援您的稿件發表決定。

[深入瞭解稿件比對器如何運作](#)

### 摘要

Background Although people of all ages are susceptible to the novel coronavirus infection, which is presently named "Coronavirus Disease 2019" (COVID-19), there has been relatively few cases reported among children. Therefore, it is necessary to understand the clinical characteristics of COVID-19 in children and the differences from adults. Case presentation We report one pediatric case of COVID-19. A 14-month-old boy was admitted to the hospital with a symptom of fever, and was diagnosed with a mild form of COVID-19. The child's mother and grandmother also tested positive for SARS-CoV-2 RNA. However, the lymphocyte counts were normal. The chest computed tomography (CT) revealed scattered ground glass opacities in the right lower lobe close to the pleura and resorption after the treatment. The patient continued to test positive for SARS-CoV-2 RNA in the nasopharyngeal swabs and stool at 17 days after the disappearance of symptoms. Conclusion The present pediatric case of COVID-19 was acquired through household transmission, and the symptoms were mild. Lymphocyte counts did not significantly decrease. The RNA of SARS-CoV-2 in stool and nasopharyngeal swabs remained positive for an extended period of time after the disappearance of symptoms. This suggests that attention should be given to the potential contagiousness of pediatric COVID-19 cases after clinical recovery.

1 **Human and novel coronavirus infections in children: a review**
23 引用文獻

[Rajapakse, N and Dixit, D](#)  
 Jan 2 2021 | Jun 2020 (早期取閱) | [PAEDIATRICS AND INTERNATIONAL CHILD HEALTH](#) 41 (1), pp.36-55

Coronaviruses, seven of which are known to infect humans, can cause a spectrum of clinical presentations ranging from asymptomatic infection to severe illness and death. Four human coronaviruses (hCoVs)-229E, HKU1, NL63 and OC43-circulate globally, commonly infect children and typically cause mild upper respiratory tract infections. Three novel coronaviruses of zoonotic origin ha ... [顯示更多](#)

 Oct 2020 | [ARCHIVES OF CLINICAL INFECTIOUS DISEASES](#) 15 (5)

Since the outbreak of coronavirus disease 2019 (COVID-19), in Wuhan, China, there were more than 10,021,401 confirmed infected cases. This infection has spread to almost all countries around the world with reported high mortality and morbidity. Infections in children and infants have been reported as well. The condition of the infected children was mostly mild. To date, there have been ... [顯示更多](#)
